

## HAITI / HONDURAS ESSENTIAL OIL UPDATE APRIL – 2013

### HAITI

Click the following headlines/links to read the articles.

**VETYVER OIL:** Export demand from Haiti has been calm during the month of April, but steady. Production has also been subdued, so no excessive accumulation of inventories occurred. Prices remained steady. We have stock and invite your inquiries.

**AMYRIS OIL:** Export sales continued to be steady. Supply of the raw material (dead Amyris wood) into Haiti has become more difficult and costly. Fuel costs for production, transportation, etc. have increased ([see above article](#)), as well as all other production costs. Prices for the oil are higher – hopefully, temporarily. We have stock and invite your inquiries.

Our oils are all natural, pure – as distilled – NOT assembled/manipulated/adjusted.

### HONDURAS

**CARDAMOM OIL:** The export prices have been volatile and our production has therefore been mostly to satisfy firm orders. There is no accumulation of stocks. For this oil, we solicit your inquiries.

**STYRAX GUM AND OIL:** Export demand and sales remained slow. Prices held steady, since any further price decline would hamper and jeopardize the collection of the raw material from the forest. Your inquiries for both the Purified Gum and the Oil are invited.

We look forward to hearing from you.
