VETYVER OIL: Export sales from Haiti were steady during the month of January. Production was able to keep up with sales. Qualities are generally good. Yields were normal with rains also normal and limited to daytime showers. All costs for production remain high. Export prices remained steady to firm. Inventories are not excessive. We have stock and invite your inquiries.

AMYRIS OIL: This oil also sold steadily and production has kept up with export demand. Qualities have been good. Stocks are normal and prices have been well maintained. There is a tendency to increase prices as distillers are holding reasonable stocks and all costs including the cost of distilling raw material are increasing. We have stock and invite your inquiries.

Our oils are all natural, pure – as distilled – NOT assembled/manipulated/adjusted.

HONDURAS

CARDAMOM OIL: Prices have dropped somewhat. We have orders for delivery as produced. For this oil we solicit your inquiries.

STYRAX GUM AND OIL: Sales have slowed down somewhat, but prices are being maintained since all costs are steady to rising. We have stock to produce the oil (645-P) on demand. Your inquiries for both the purified gum and the oil are invited.

We look forward to hearing from you.
